Re: Berry's Creek study Area

Dear Mr. Ausubel:

Pursuant to your letter of November 12, 2002, I can provide the following response to the questions you designated.

8. Hazardous wastes were removed by outside contractors to recycling or disposal facilities. See NJDEP ECRA/ISRA Case No. 84205 for a detailed description of the extensive remedial work that has been performed at the site.
12. The transporters are unknown. The Chemsol Superfund site in Piscataway, NJ was a disposal facility.
15. Conditions at the Site are described in ISRA Case No. 84-205. The Site is not in the Berry's Creek watershed and there were no releases to the Berry's Creek study area or to "Esengee Investors" ..

This confirms our belief that we were not involved with the Berry's Creek Study Area or any releases to that site.

If there is anything else that you require, please let me know.

Very truly yours,

Kent Garson

cc: James V. Maher

P.S. - Please note the new address of our Corporate Office.
